

## Come on board

It's a great time to get involved with Low Carbon Chilterns.

You can become a member by completing the membership form. Membership costs £1 per year, and we ask you for a one-off subscription of £50 for 50 shares in LCCC at the same time.

It is the Chilterns Low Carbon Co-operative that raises the money and invests all profits back into the community it serves. You too can invest in your community.

**Contact details:** Low Carbon Chilterns Co-operative, 28 Sandelswood End, Beaconsfield, Bucks HP9 2AE

*...a member-owned & run, not-for-profit, community organisation*

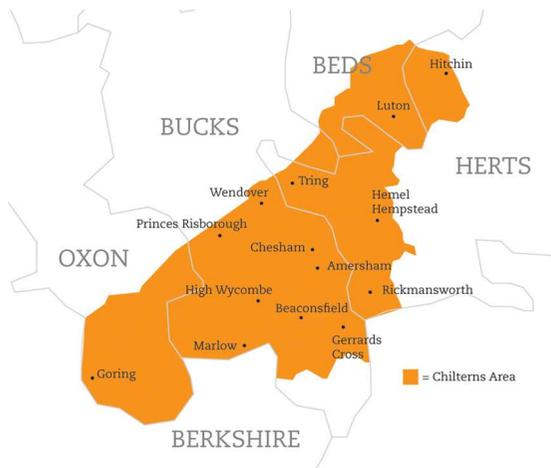

# ...helping the community to save energy and generate clean power...

## Who are we?

The Low Carbon Chilterns Co-operative started in 2011 to work with the managers of community buildings by helping them to improve their energy efficiency and install renewable energy.

We raise money for these projects from grants and local communities. We also involve the users of the community buildings in these improvements, and hope to inspire them to undertake energy improvements in their own homes.

In a very practical way, we want to reduce the carbon emissions in the Chilterns, and do our bit to improve energy security, as well as to make life better in our own communities.

## The benefit to you

We all use our local community buildings – community centres, village halls, schools – but they can waste energy and be too hot or too cold.

Interested in helping your community become more energy efficient? Then please give us a call.

..and there is a lot more to this than just solar panels... We are looking at the whole building including its insulation, lighting and heating systems. Have you thought of a biomass boiler or maybe a wind turbine in the playing field? This is energy saving & generation that the whole community can own....

## Lend a hand

We are looking for buildings that can benefit from a complete energy make-over.

The new investment will make your community building or school cheaper to run and more comfortable to be in.

Would your community building or school like to benefit from these new investments?

Being a Co-operative we are owned by our members. The people running this co-op are members and volunteers. Would you like to help?
